Start with a square plain or colored piece of paper. Fold diagonally in both directions.

Fold each corner into the center point.

Turn over and again fold each corner into the center point.

Without turning over, fold in half along creases shown, both ways, and open.

Number each segment from 1-8.

Open up each flap and write a fortune in each segment. Here are some examples of fortunes to write:

- You will get an A+ on the test
- Be very careful on Tuesday
- You will win the lottery
- You will have many friends

Turn the model over and write a color on each flap as shown. You’re done! Now use fingers to open and start telling your friends’ fortunes.
